

Traumatic Brain Injury (TBI)

To document a traumatic brain injury, the following is needed:

A comprehensive evaluation report by a rehabilitation counselor, speech-language pathologist, orthopedic specialist and/or neuropsychologist (or other specialties as appropriate), including:

1. Assessment of cognitive abilities, including processing speed and memory
2. Analysis of educational achievement skills and limitations
3. Defined levels of functioning and limitations in all affected areas.
*Communication, vision, hearing, mobility, psychological, seizures, and any other relevant problems should be addressed as needed.
4. Current report/letter typed, signed and dated on letterhead (within one year with recommendations for post-secondary accommodations relative to the diagnosed disability, including rationale and duration for which these accommodations should be provided based on the current assessment).
