- 313: Replaced Hanging Projector **(Completed)**

NOTES:

Region 9 PEXIP CONNECTION:

Greg Fowler and I meet at Region 9 on February 01, 2016 to discuss ITV equipment/connections and what Region 9 is looking at for future equipment. One area we discussed was what Vernon College is doing with Skype and the issues we been having.

The State of Texas has a system that is Skype like called (PEXIP) which Region 9 connects to. It is a direct connection and doesn't use "Public Internet" as Skype. This means the bandwidth is dedicated for the call which gives for a much better connection.

We are working with Region 9 to do testing of (PEXIP) to evaluate the quality and usability for Vernon College.

ITV REPLACEMENT SYSTEMS: (On Going)

Region 9 is providing specs and list of providers to Vernon College for replacement of the current Tandberg classroom systems.
