Use of data:

Severe Weather Drills will continue to be held each semester for the Vernon College dorms. The threat of tornadoes in North Texas primarily occurs in the spring and the timing of the drill will be held according to spring weather patterns – earlier or later in the semester. All housing facilities should be able to be evacuated in under 5 minutes. The dorm basement serves as a tornado shelter for the Vernon Campus.

How associated to Student Success?

Student safety is important to student success. It is also important that students be fully aware of what to do in an emergency situation so that they can make safe choices without lengthy consideration.
