Use of data:

Fall 2016 online survey participation resulted in forty-eight percent (48%) of the surveyed classes (26 of 54 classes) receiving at least five responses, the minimum necessary to generate a report with seventeen percent (17%) or 168 students participating in the survey process. The results provide detailed information for each instructor/course surveyed. Division Chairs, supervisors, and instructors can use the data to help identify areas of strength and areas where instructors have opportunity for improvement. The comparative data provides data by various categories to assist users in interpreting the report fully.

How associated to Student Success?

As instructors improve pedagogically, it is anticipated that student success rates as measured by retention, completion, and transfer rates, will improve.
